Esther T. Thyssen, Ph.D.

Digital Humanities and the Relational Database: An Introduction and Case Study

This talk will provide a brief overview of research materials in digital formats, and the breadth of programs now available for computational processing. The case study will outline how the Relational Database method can be used for a project of creating a digital database about East-European arts and artists of the Cold War Era.

Esther T. Thyssen is Associate Professor at Montserrat College of Art, Beverly, MA.

"It is a capital mistake to theorize before one has data."
(Arthur Conan Doyle, *The Adventures of Sherlock Holmes*, 1892)

All Are Welcome!

Time: 12.10 on April 16, 2014 Venue: Studio 111
