- the psychological and cognitive aspects of language

What our students say

"Linguistics is very exciting, because when someone studies this science, they have to independently and carefully consider what seems completely natural and familiar - language." - Sergei Nazaraliev (visiting student, 2023)

"Students in every class are multilingual and multicultural and you learn about the languages of your groupmates while sharing and discussing yours." - Sevara Butaeva (M.A. student in English Linguistics, class of 2022)

"It is exciting to experiment and also to see how researchers' ideas changed throughout the decades. To my mind, it is fascinating that we still cannot answer every question: there is more to be discovered." - Darinka Végh (teacher trainee in English and Hungarian, class of 2025)

"The educational process is well-structured, ensuring that you acquire all the necessary knowledge to become a sought-after specialist. The professors are wonderful scholars who are passionate about their work and eager to share their experiences with students. There is a friendly atmosphere in the classes, and everyone is encouraged to share their own opinions." - Arina Konstantinova (visiting student, 2023-2024)
